## DEBURRING \& FINISHING

## ORIGINAL ROUND BOWLS

The Original Round Bowl (OR Series) is the only round bowl series in the ALMCO product line that can be fitted with dividers. The dividers provide multiple compartments and allow spaced sections for individual parts handling, preventing part-on-part contact and eliminating the need for fixturing. The curved polyurethane-lined bowl keeps parts immersed in mass to give either gentle or aggressive deburring, and the urethane drain plates and constant spray system keeps parts clean while rotating in the bowl. These machines work best for batch processing where parts are to be discharged onto an external screener for separation.

When parts and abrasive media are placed into the flat bottom bowl, its vibrating action causes millions of small collisions between parts and media, resulting in the removal of material along part edges and corners. A mixture of water and finishing compound washes away residual particles, resulting in a clean, smooth finish. Parts are loaded and unloaded from the rotating mass without stopping the machine.

Dividers

Sound Hood

OR-5

OR-10

## Standard Features:

- Wet or dry processing capabilities
- Space-saving, low-profile design for easy load and unload
Curved polyurethane-lined bowl for maximum finishing action
Variable speed motor for process flexibility

## Options:

Automatic lubrication system

- Flowmeter
- Carousel and dividers
- Tachometer
- Air-operated discharge door
- Robust sound hood

UL 508A electrical controls

OR-23

## Specifications

| Model | Working Capacity (Cu Ft.) | Channel Cross Section (In) | Drive HP | Overall Dimensions (In) |
| :---: | :---: | :---: | :---: | :---: |
| OR-3 | 2.4 | 8.25 | 2 | $53 \times 36 \times 40$ |
| OR-5 | 4.5 | 10 | 3 | $57 \times 45 \times 40$ |
| OR-10 | 8.1 | 12.5 | 5 | $69 \times 53 \times 49.5$ |
| OR-20 | 17 | 17.25 | 10 | $80 \times 60 \times 52.5$ |
| OR-23 | 22.8 | 19 | 10 | $80 \times 66 \times 55$ |
